

MD RAKIBUL ISLAM ASIF

Junior Frontend Developer

Dhaka, Bangladesh • 01611232300 • rakibnasif@gmail.com • [linkedin.com/in/rakibnasif](https://www.linkedin.com/in/rakibnasif) • github.com/rakibnasif

OBJECTIVE

Aspiring Frontend Developer and Computer Science student with a strong foundation in modern web development, DOM manipulation, and interactive UI engineering. Proficient in JavaScript (ES6+), HTML5, CSS3, Java, and SQL, with hands-on experience building dynamic client-side applications. Passionate about writing clean, maintainable code, optimizing frontend performance, and collaborating in team environments to deliver seamless user experiences.

EDUCATION

Bachelor of Science in Computer Science and Engineering — *Bangladesh University of Business and Technology* 2022 – 2025

SKILLS

Frontend & Web Dev: JavaScript (ES6+), HTML5, CSS3, DOM Manipulation, Dynamic Data Sync, Responsive UI
Languages & Databases: Java, SQL, C, C++
Developer Tools: Git, GitHub, VS Code, Browser Developer Tools
Soft Skills: Problem Solving, Team Leadership, Technical Communication, Collaboration

PROJECTS

Student Card Management System (Vanilla JavaScript, HTML5, CSS3) [\[Live Demo\]](#)

- Architected an interactive web application featuring dynamic form components including custom dropdowns, radio selection groups, and conditionally visible checkbox inputs.
- Engineered client-side state logic using pure Vanilla JavaScript to handle real-time Add, Edit, and Delete (CRUD) operations without reliance on external frameworks.
- Implemented dynamic data binding and real-time DOM synchronization to instantly reflect input changes and calculated marks within structured table components.

Rock Paper Scissors Interactive Game (JavaScript, HTML5, CSS3) [\[Live Demo\]](#)

- Built a fully dynamic browser-based game implementing core JavaScript decision logic, condition handling, and state management completely from scratch.
- Leveraged DOM manipulation techniques to update game status, render visual outcome feedback, and track user scores dynamically in real time.
- Structured modular event listeners and responsive UI styling to deliver an engaging, intuitive user experience across device viewports.

Chor Police Babu Dakat Game (JavaScript, HTML5, CSS3) [\[Live Demo\]](#)

- Developed a browser-based version of the traditional Bengali role-guessing game, implementing role assignment among Babu, Police, Chor, and Dakat with core JavaScript game logic.
- Managed multi-round game state and score tracking, and rendered an end-of-game summary screen through real-time DOM updates.
- Designed a clean multi-screen interface (start screen, gameplay, summary) with responsive styling for use across device viewports.

EXTRA-CURRICULAR ACTIVITIES & LEADERSHIP

- Academic Team Leadership:** Led student project groups in university coursework, coordinating task distribution, version control workflows on GitHub, and project presentations.
- Competitive Problem Solving:** Actively practicing algorithmic logic, Data Structures, and modern frontend development patterns to sharpen core engineering skills.
